THE RECORDS ARE THE ASSET

In aviation, every minute on paperwork stands between you and monetizing your assets.

Agentic Records Manager (ARM) reads every record, verifies it against the standards that govern your parts, and auto-assembles the finished document packages your deals turn on. Days of cross-department chasing collapse into one clear, shared workflow spanning procurement, sales, quality, and logistics — so your teams stop hunting paper and start closing.

USM Trace Pack 6 / 7 VERIFIED

P/N 3214-005-1 · S/N 4471 · FUEL PUMP

less time preparing pre-purchase and sales document packages.

PER TRANSACTION

REPORT TEMPLATES

Start from a template — or build your own.

Two of the most-used packs; more ship with the product.

FOR PROCUREMENT · BUYING

Pre-Purchase Inspection Report

Know exactly what you're buying — before you commit.

ARM builds the inspection package straight from the records and flags every missing 8130-3, broken back-to-birth chain, and inconsistent field up front. You bid and buy on facts, not on a seller's promise.

AUTO-ASSEMBLED · REVIEW-GATED

FOR SALES & MARKETING · SELLING

USM Trace Document Package

Prove the asset. Close the sale — your logo and brand on the pack.

A complete, verified USM trace pack — commercial trace, ARCs, removal and shop records — assembled and ready to attach to any quote or listing. Buyers get the confidence to move; you protect full value on the way out.

AUTO-ASSEMBLED · REVIEW-GATED

PART SALES KIT
Everything to quote and ship a part.

ENGINE SALES KIT
Full records for an engine sale.

LEASE RETURN
Ready-to-go checklists to manage return of your aircraft, engine, and components from lease.

CUSTOM
Built to match your exact workflow.

TESSARON · COPILOT

Meet Tessaron. INCLUDED

Tessaron is ARM's **included copilot** — the document-intelligence meta-model Block Aero builds, tunes, and manages for you. Point it at your aircraft, lease, and asset records: it reads, classifies, links, and verifies every page, so your people work from clean, audit-ready data instead of paper. You own the decisions; Tessaron does the heavy lifting. It is not what you buy — **ARM Agent** is the billed unit. Usage is metered in Aero Compute Credits (ACC).

- One orchestrated pass — intake, classification, extraction, linking, and compliance
- Hundreds of ATA, ASA, AFRA, and IATA standard record types — including handwriting
- Relationship mapping and airworthiness compliance flags across documents
- Powerful AI performance by multi-model orchestration

HOW IT WORKS

From an unsorted stack to an auto-assembled pack.

STEP 01	STEP 02	STEP 03	STEP 04	STEP 05	STEP 06
INGEST	**READ**	**EXTRACT**	**RESOLVE**	**REVIEW**	**ASSEMBLE**
Pull records from upload, Google Drive, SharePoint, or machine-to-machine.	Auto-OCR scanned pages and segment packs up to ~1,500 pages.	Tessaron classifies each document and pulls P/N, S/N, ESN, dates, cert refs.	Match each record to the right organization, part, and asset.	Approve or edit in one queue; high-confidence items auto-approve.	Auto-build the branded pack — your logo on the cover — and secure proof of ownership on-chain.

WHAT YOU BUY

ARM AGENT

The billed unit. In-product: Deploy ARM Agent.
Go to ARM Agent to plan autonomous work. Tessaron stays the copilot.

SKU

TESSARON · COPILOT

Included with ARM. Grey copilot that reads, classifies, and verifies. Not a SKU.

INCLUDED

Get access to ARM · free to start, no card, no demo. Deploy ARM Agent on this account. Tessaron ships with the workspace; there is no Tessaron edition to pick.

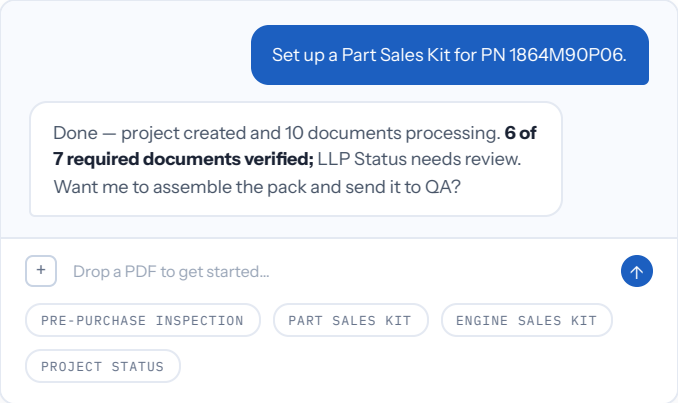
Fluent in the documents you live in. read by Tessaron, ARM's included copilot, and validated against the standards that govern your parts

FAA 8130-3 · EASA FORM 1 · CAAC AAC-038 · REMOVAL TAG · SHOP VISIT REPORTS · AD / SB · NIS / ICS · BACK-TO-BIRTH TRACE · LLP STATUS · MATERIAL CERT · CERT OF CONFORMITY · COMMERCIAL TRACE

TESSARON · COPILOT

Or just ask.

Drop a PDF and tell Tessaron what you need — it sets up the project, runs the checks, assembles the pack, and loops in a colleague to review or approve when you're ready. ARM never signs, releases, or issues airworthiness. A named reviewer still approves.



FOR USM & PARTS DISTRIBUTORS

Every part ships with a clean trace pack.

Turn a part's scattered paperwork into a complete, verified trace package — ready to attach to a quote or ship in the box. Catch missing 8130-3s and broken chains before your customer does, and re-package the same records for sales, purchasing, and quality in seconds.

FOR ASSET MANAGERS & LESSORS

From messy lease return to clean deliverables.

Redeliveries always land late and in a panic — ARM is the extra pair of hands. It sorts the mountain of records an operator hands back, verifies every document, and produces organized, high-quality deliverables — no surge headcount, no expensive records consultants.

THE PAYOFF

Faster transactions

Deal-ready packages in a fraction of the time — up to 90% less prep per transaction.

Protected asset value

Complete, verified trace keeps parts sellable and assets at full residual value.

Collaborative & integrated

One shared, genuinely enjoyable workflow across procurement, sales, quality, and logistics.

Audit-ready by default

Every document classified, checked, and logged continuously — not at crunch time.

TRUSTED BY DESIGN

Human-in-the-loop

ARM never signs, releases, or issues airworthiness. A named reviewer still approves — nothing enters a package until they do, or it clears the confidence threshold you set.

Proof of Ownership

ON-CHAIN

Secure proof of ownership and an unbroken chain of custody, recorded on the Block Aero Aviation Blockchain Network (ABN).

Regulation-aware

Built around FAA, EASA, and CAAC document standards and the exact fields each one requires.

Enterprise-ready

Sign in with Google, or a password your administrator controls. Your records are visible only to your organization — isolation enforced in the database.
